université PARIS-SACLAY

## STARTUP GAME ON THE THEME OF SENSORIALITY IN PARTNERSHIP WITH MATRICE

Take part in a 75-minute Startup Game with our partner Matrice to define and prototype an innovative entrepreneurial project!

Only one project will win! The team with the best pitch will win a prize!

### When?

Monday, November 4, 2024 from 1:30 pm to 6 pm

### Where?

Auditorium 1 - 45 avenue des États-Unis 78000 Versailles

### Event description:

The new edition of the Start'up Games on November 4, 2024 will take place on the Campus of the UFR des Sciences and will be reserved for students of the Master FESAPCA exceptionally, taking into account the number of registrations, but we count on the participation of the greatest number for the next editions. Organized in partnership

with Matrice, BPI, Université Paris-Saclay, UVSQ and UVSQ's ISM-IAE, this event offers students a concrete and interactive introduction to entrepreneurship. Through serious games, participants develop their skills in creativity, teamwork and problem-solving - all essential assets to enable them to approach all entrepreneurial skills.

For this year's edition, students will benefit from the support of mentors from the Matrice association, who will draw on their entrepreneurial experience to advise them on their first steps. At the end of the session, a film crew will be on hand to gather live feedback from participants. This authentic feedback will enrich the perspective of the event.

The sensory Start'up Games are not just an exercise, but a real opportunity for students to project themselves into the world of entrepreneurship. This inspiring course will be the starting point for future UVSQ talent, and registration promises to be a must for all enthusiasts of innovative projects and entrepreneurial adventures!
