STARTUP GAME ON “QUALITY, SAFETY AND ENVIRONMENTAL MANAGEMENT” IN PARTNERSHIP WITH MATRICE

After previous editions dedicated to the healthcare, space and perfumery-cosmetics sectors, the UVSQ is pursuing its commitment to developing the entrepreneurial spirit among its students with a new edition of the Startup Games, this time dedicated to Quality, Safety and Environmental Management.

Organized in partnership with **Matrice** and integrated into the **Maturaction PEIPS program**, this event immerses participants in a fun and dynamic experience, where they are faced with challenges inspired by real industry issues. The aim is to stimulate their ability to innovate and structure an entrepreneurial project, whether they choose to become entrepreneurs or integrate these skills into their future career path.

This year's event, to be held at **ISM-IAE**, marks a further step in our ambition to extend this approach to **all UVSQ campuses**. After MQSE, a new edition is already planned for April on the Science campus, with a focus on actuarial science and statistics.

With the **Startup Games**, UVSQ encourages its students to explore entrepreneurship from a new angle: **that of a strategic lever for innovation in all fields**.
